

# ▶ KASPERSKY ENDPOINT SECURITY FOR BUSINESS Security Center

The powerful administrative console that unifies every aspect of Kaspersky Lab's endpoint, file server and virtual infrastructure protection under one 'pane of glass'.

## A single control console capable of managing all security aspects of your IT environment:

- ANTI-MALWARE
- FIREWALL
- CLOUD-ASSISTED PROTECTION
- APPLICATION CONTROL
- APPLICATION WHITELISTING
- WEB CONTROL
- DEVICE CONTROL
- FILE SERVER PROTECTION
- MOBILE DEVICE MANAGEMENT
- MOBILE ENDPOINT SECURITY
- ENCRYPTION
- SYSTEMS CONFIGURATION AND DEPLOYMENT
- ADVANCED VULNERABILITY SCANNING
- PATCH MANAGEMENT
- VIRTUAL SYSTEMS SECURITY
- NETWORK ADMISSION CONTROL

## EXPANDABLE

As your security requirements evolve, new features and tools can be unlocked within Kaspersky Security Center to enhance both your security and IT efficiency. Each tier enables more features — something for every sized organization.

## COMPREHENSIVE

Depending on the tier you choose to deploy, Kaspersky Security Center includes:

- Endpoint anti-malware configuration and deployment
- Centralized policy settings for applications, web usage and connected devices
- Encryption configuration and deployment
- Licensed software usage and compliance tools
- Mobile Device Management for mobile device security configuration
- Workstation provisioning, image creation, deployment, storage and management
- Hardware and software vulnerability scanning and advanced patch management
- Support for physical, virtual and mobile device security
- Network Admission Control to enable guest user policies

## SYNERGIZED

Our business solutions form a security platform. Kaspersky Security Center and all of Kaspersky Lab's security modules and tools were developed in-house — not acquired from other companies. The same programmers working from the same codebase have developed technologies that talk to each other — and work together. You get stability, integrated policies, useful reporting and intuitive tools.

- **Highly intuitive user interface** — clear, actionable information in your administrator's direct line of sight.

- **Virtualized environment support** — recognizes virtual machines in the corporate administration structure and facilitates load balancing during intensive operations, avoiding performance-slowness antivirus 'storms'.

- **Web interface** — remotely monitors protection status and reports on key events from a flexible and accessible interface.

- **Mixed environment support** — unmatched support for operating systems and virtualization platforms including Windows®, Netware, Linux®, Mac, Android™, BlackBerry®, Symbian and Windows Mobile.

- **Pre-defined policies** — follow best practice with Kaspersky's pre-configured policies, or create your own.

- **Automated mobile policies** — set and enforce policies automatically when devices leave the corporate network. Perfect for protecting a hyper-mobile workforce.

- **Scalable support** — whatever size your infrastructure, Kaspersky Security Center offers configuration, deployment and management tools, flexible policy options and robust reporting to meet your needs.

- **Remote office support** — create a separate "virtual" administration server and enable a local update agent for each office. This will enhance your security and lower inter-office bandwidth requirements.

## WHICH TIER OF KASPERSKY BUSINESS SECURITY IS RIGHT FOR YOU?

### POLICY CONTROL ISSUES?

Deployments of Kaspersky Endpoint Security for Business at the Select tier, include easy to use Application Control, Device Control and Web Control.

### NEED TO SECURE A MOBILE WORKFORCE USING TABLETS AND SMARTPHONES?

Beginning with the Select tier, you can benefit from Mobile Device Management (MDM) and an endpoint application to install on your Android, BlackBerry, Symbian and Windows mobile devices.

### NEED TO PROTECT DATA ON LOST OR STOLEN DEVICES?

Kaspersky Endpoint Security for Business, Advanced tier, adds the security of encryption. Choose from full-disk or file level.

### ARE YOUR IT TOOLS TOO COMPLEX?

Within the Advanced and Total Security tiers, you'll benefit from the simplicity of Systems Management which includes PC configuration and provisioning tools combined with advanced patch management, Network Admission Control plus inventory and licensing tools.

### LOOKING FOR PEACE OF MIND FOR THE ENTIRE NETWORK?

Kaspersky Total Security For Business combines all the endpoint protection features plus mail, collaboration and internet gateway security.

### IS YOUR ENDPOINT SECURITY SOLUTION TOO COMPLICATED?

All of Kaspersky's endpoint features are managed under Kaspersky Security Center and all written from the same codebase. You can trust Kaspersky to simplify your security.

Product Tier	Kaspersky endpoint and infrastructure security features (each tier is cumulative)	Management features included at this tier (each tier is cumulative)
